

NAVODILA IN PRIMER NALOGE

Matemčki so profesorju Matemčku opisovali, kako so sestavljanke iz kock videli z leve, od spredaj in z desne strani. Profesorju so pokazali pravilno obrnjene oblike iz samih kvadratov, profesor pa je moral uganiti, kaj bi Matemčki utegnili opisovati. Profesorju je bila v pomoč risba različnih sestavljanek iz kock. Obkrožil je tiste, ki so ustrezali Matemčkovim opisom. Katere je obkrožil?

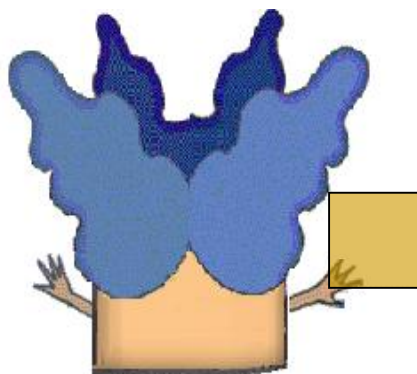

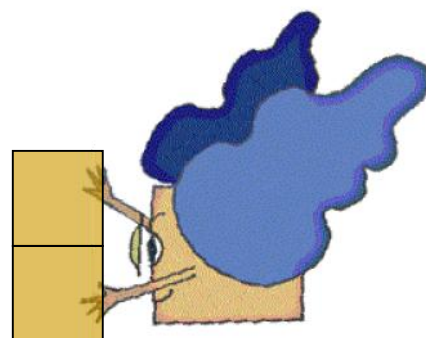

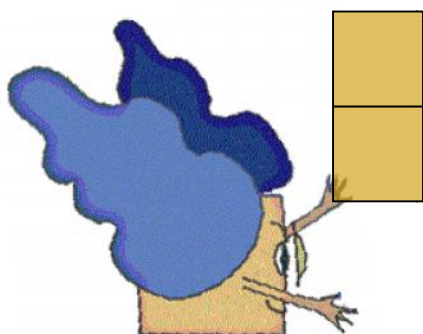

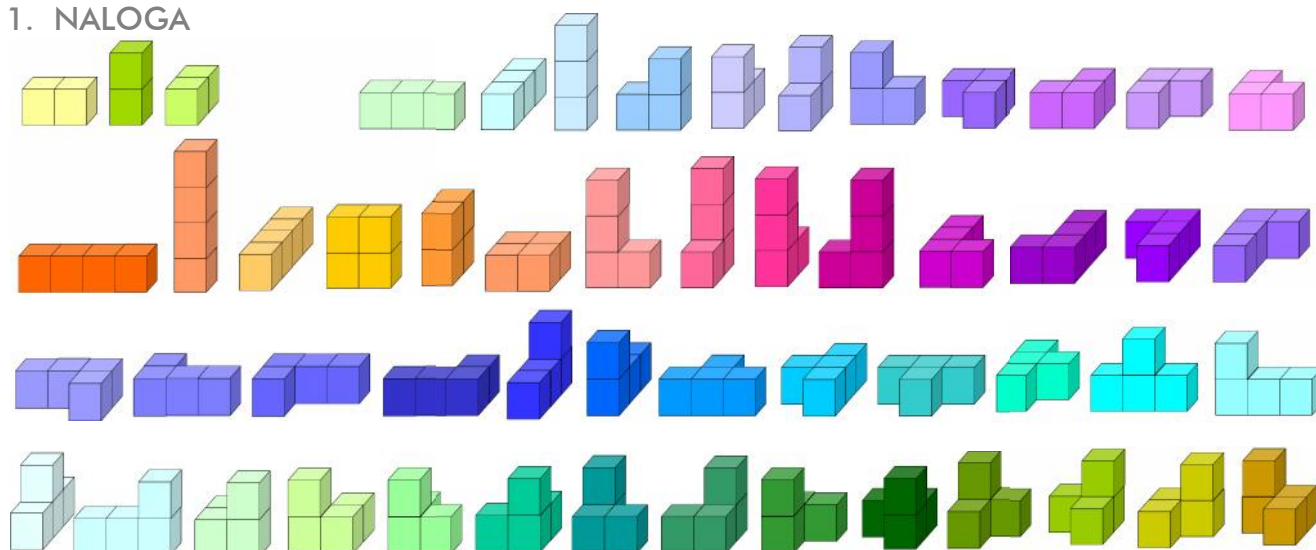

Matemčki so sem in tja profesorju ponagajali in mu pokazali oblike, po katerih ni bilo mogoče ničesar sestaviti.
